

FRONTEND DEVELOPER ASSESSMENT

Thank you for applying for the Frontend Developer role. Below are the detailed instructions for your assignment.

- **Task:** Recreate the Homepage design provided in the following Figma link using React and deploy it on Vercel:

[https://www.figma.com/design/BWtutOCqSUinQiqoSCDQ0c/Register-Karo-Home-Page-\(Copy\)](https://www.figma.com/design/BWtutOCqSUinQiqoSCDQ0c/Register-Karo-Home-Page-(Copy))

Requirements:

- Use React (preferably the latest version).
- Ensure the page is responsive and functions seamlessly across devices (mobile and desktop).
- Achieve a PageSpeed Insights score of 90 or higher on both mobile and desktop versions of the page.
- Deploy the project on Vercel and provide the live URL.
- **Deliverables:**
 - A GitHub Repository with:
 - Your project code, well-organized into clean and modular components.
 - A live Vercel Deployment URL of the project.
 - Screenshots of the PageSpeed Insights scores for mobile and desktop.

- **Evaluation Criteria:**

- Code Quality: Clean, reusable, and modularized code.
- Design Accuracy: How closely the implementation matches the provided Figma design.
- Responsiveness: A seamless user experience across various screen sizes.
- Performance: Achieving a PageSpeed Insights score of 90 or higher on both mobile and desktop.
- Deployment: A fully functional live link on Vercel.
- Documentation: Clear and concise README file.

- **Timeline:** Complete and submit the assignment by Monday (9 AM)
